UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION 5

MEMORANDUM

DATE: APR 03 1992

SUBJECT: Draft Site Investigation for the Installation Restoration Program at
Naval Air Station, Glenview, Illinois

FROM: Harry M. Pawlowski, Environmental Engineer *Harry M. Pawlowski*
Drinking Water Section

TO: Sangsook Choi
Environmental Review Branch

The Drinking Water Section has reviewed the Draft Site Investigation for the Program at the Naval Air Station in Glenview, Illinois, dated March 6, 1992, and offer the following comments.

Background:

The Naval Air Station is located in Glenview, Illinois about 20 miles northwest of Chicago and 5 miles inland of Lake Michigan. Potentially hazardous conditions at a number of sites on the base are suspected to be the result of practices involving the storage and use of aviation fuel and the use or disposal of hazardous materials and petroleum wastes. The Naval Air Station uses water which is furnished through public and self-supplied systems. The communities surrounding the base are supplied potable water from Lake Michigan.

Comments:

The Drinking Water Section has reviewed the Site Investigation Report and has no comments.
